SUMMARY

Undergraduate student in Information Science with practical experience in using Figma software UI/UX design, data analysis with querying SQL, data modeling with Python and interpretation data using Looker Studio. Demonstrates a strong work ethic, attention to detail, and a proactive approach to learning data interpretation, assessment concepts, and decision making.

Relevant Coursework:

- **Information Retrieval** : Techniques for searching, extracting, and evaluating relevant information from large datasets
- **Metadata** : Structuring and managing data to improve data organization and accessibility
- **Statistics** : Statistical analysis and interpretation for data-driven decision making
- **Data Science** : Data processing, analysis, and large-scale data handling

PROFESSIONAL EXPERIENCE

PT. Kimia Farma, TBK

Big Data Analyst X Rakamin Academy (Jan 2026 - Feb 2026)

- Querying:

Transforming data into Data Warehouse using ETL process by effective query optimization

- Data Marting:

Hands-on experience in structuring data for analysis, showcased through the creation of organized data marts for effective decision-making.

- Visualization:

Developing a visually appealing sales dashboard demonstrated my proficiency in translating complex data into clear visual representations.

Majelis Permusyawaratan Mahasiswa (MPM) UPN “ Veteran Jakarta “

Commission 3, Supervision and evaluation of the UPNVJ Student Executive Board in the Social and Political Field Intern (Okt 2025 - Nov 2025)

- Monitoring work programs implemented by the social and political fields , Evaluating work programs created from planning to implementation in the social and political fields

PT. Pertamina Transkontinental

Information Communication Technology Intern (Juli 2026 - Present)

Contributing to data analytics and digital transformation initiatives within the ICT Division by supporting data-driven decision-making across integrated marine logistics operations. Working with business and operational data to develop analytical solutions, improve reporting efficiency, and deliver actionable insights that support organizational performance.

Key Responsibilities:

- Analyze operational and business data to support strategic decision-making within PT Pertamina Trans Kontinental.
- Design and develop interactive dashboards and KPI monitoring reports for marine logistics and corporate performance.
- Transform raw operational data into actionable business insights through data visualization and reporting.
- Assist in improving reporting efficiency by automating data processing and reporting workflows.
- Collaborate with business users and ICT teams to translate business requirements into data-driven solutions.
- Support digital transformation initiatives by leveraging analytics to enhance operational efficiency and business performanc

EDUCATION

Universitas Pembangunan Nasional “Veteran” Jakarta

Bachelor of Information Science | GPA: 3.73/ 4.00 | 3th Semester

SMA Negeri 93 Jakarta

IPA | Grade 89,73 /100

AWARDS

2nd Place National IT Competition IDENTITAS 2025 "UI/UX Design"

Released by the Information Management Study Program, Astra Polytechnic · Dec 2025

2nd Place National IT Competition INVOFEST 2025 "UI/UX Design"

Released by the Information Technology Student Association (HMPTI) of Harkat Negeri University · Nov 2025

ORGANIZATIONS

Dicoding Community Member (05/2025 – present)

Participated in an IT-based learning community focused on developing skills in data, UI/UX, and web development through collaborative and project-based learning.

- Applied knowledge gained from the community to participate in multiple national-level competitions, enhancing problem-solving and analytical skills •
- Utilized tools such as Excel, SQL, and collaborative platforms to support data analysis and project-based learning activities •
- Developed foundational skills in data analysis, UI/UX design, and web development, while strengthening teamwork and communication skills
